DETAILED ACTION

1. Upon review of applicant's response dated 07/05/2005, it is noted that a restriction/election is warranted. Any inconvenience to applicant is regretted.
2. This application contains claims directed to the following patentably distinct species of the claimed invention:
 - I. Embodiment wherein the physical road lane data indicating start and end points.
 - II. Embodiment wherein the physical road lane data indicating a sublane.
 - III. Embodiment wherein the physical road lane data indicating what extending physical features are adjacent to and extend along the physical road lane on a right and a left side.
3. Upon election of I only, the applicant is further required under 35 U.S.C 121 to elect one of the following disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable (currently, no claims appear to be generic):
 - IA. Another physical road lane can be entered by a lane change.
 - IB. Another physical road lane cannot be entered by a lane change.
4. Upon election of I only, the applicant is further required under 35 U.S.C 121 to elect one of the following disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable (currently, no claims appear to be generic):

Art Unit: 3663

la. Physical road lane less than full width becomes a physical road lane of full width immediately ahead in a direction of travel of the physical road lane.

lb. Physical road lane less than full width ends entirely immediately ahead in a direction of travel of the physical road lane.

5. Upon election of I only, the applicant is further required under 35 U.S.C 121 to elect one of the following disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable (currently, no claims appear to be generic):

li. Geometry of represented physical road lane represented using a clothoid.

lj. Geometry of represented physical road lane represented using a spline.

6. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record

Art Unit: 3663

showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
